printrove Printrove

How do I edit a product in the Product Library?

All the products in your product library can be edited. Please note that any changes will appear only in the orders that are placed after the update is done. If an order was placed before the changes, the product will retain the previous design.

1. Login to the Printrove Merchant Panel
2. Go to **Product Library > Manage Products**
3. Search for your product using the SKU name or design name.
4. Click on the **Edit icon** on the right to open the product designer.
5. Click on **Save** once you finish editing your product.
